

WE ARE

Looking for you! A seed production talent with an innovative view on crop production and global organizational processes.

Solynta is an innovative technology driven company that wants to turn the world food supply upside down with its hybrid potato. Based on innovative research and breeding technologies, we developed diploid potato varieties with true potato seeds as starting material. www.solynta.com

Our mission is to realize a sustainable change in world food supply with our innovative hybrid potato. To expand our Supply Chain team and to provide our customers with good quality seeds, we are looking for a:

Seed Production Specialist

(full-time)

YOUR ROLE

In your role as a Seed Production Specialist you will be responsible for the monitoring and improvement of the running seed productions. Therefore you will work closely together with the production research team, breeding team and several external producers. You will optimize the seed production protocol, closely monitor the practical implementation and actively suggest improvements when needed.

You are driven, practical-oriented and flexible to support our seed production partners all over the world. You will keep close contact to help and support them. In addition, frequent visits to these producers will be part of the job.

You will mainly work in our greenhouse facilities in Ressen. Project or team meetings will often take place in our headquarters in Wageningen. Furthermore, you are able and willing to travel frequently to visit our (international) seed production locations (20-30% of your time).

REQUIREMENTS

- Essential is proven hands on crop expertise from working in the field or greenhouse
- Bachelor's degree or higher (HBO+) in Plant Sciences or related studies
- 0-5 years professional work experience
- Flexible work attitude: offer support during peak moments in seed production and frequent (international) travels
- Excellent communication: good soft skills to discuss (crop) problems with external producers and to improve processes globally
- English communication and reporting skills at good level; other languages are a pre
- Able to work efficiently in a dynamic start-up environment where every day brings new challenges

WE OFFER

- A challenging job in an international seed production network
- Many opportunities for growth, personal development and initiative
- A start-up and international environment
- A competitive salary, depending on work experience and education
- A temporary employment and the intention for a permanent position.

If you are motivated to strengthen the Supply Chain team, you are invited to send your motivation plus CV per email to: info@solynta.com.
